Minutes sprint 3 retrospective

In attendance:
R: Robert Banu
J: Jesse van der Velden
M: Mahedi Mridul
P: Peter Knot

1. What worked well this sprint that we want to continue doing?

R: because of the exams we had limited time but we still managed to get quite some stuff done. We should make a sprint4 branch on Gitlab because having a sprint specific "master" worked really well.
J and R: We managed to implement features that provide real imminent functionality and makes our website looks good.
P: everybody is more comfortable with using Git. There are a lot less merge conflicts and the branches are named correctly.

2. What didn't work well this sprint that we should stop doing?

J: it still happens that people are late for the meeting in the morning. Other than that it's going pretty well.

3. What should we start doing or improve?

J and R: We need to keep the Trello board more up-to date. It is not an accurate depiction of the current situation.

P.S This retrospective is quite short, but we feel like we said everything we need to. Everything went quite smooth
